

microeconomics 5th edition pindyck pdf

In economics, supply is the amount of something that firms, producers, labourers, providers of financial assets, or other economic agents are willing to provide to the marketplace. Supply is often plotted graphically with the quantity provided (the independent variable) plotted horizontally and the price (the dependent variable) plotted vertically.. In the goods market, supply is the amount of ...

In microeconomics, the long run is the conceptual time period in which there are no fixed factors of production, so that there are no constraints preventing changing the output level by changing the capital stock or by entering or leaving an industry. The long run contrasts with the short run, in which some factors are variable and others are fixed, constraining entry or exit from an industry.
